SUPPLEMENTAL DETAILED ACTION

Information Disclosure Statement

The IDS filed 11/15/2005 has been considered by the examiner.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 9, 22, and 23 appear to be allowable over the prior art of record.

As per claims 9, 22, and 23, Barrett US 5,199,069 in view of Masuda US 2003/0046564 in view of Brundrett US 6,249,866, in view of Epstein US 6,694,025

The combination fails to teach a "key information storage section for storing and outputting the encrypted encryption/decryption key designated by the control section to be used for cryptographic communication and an encrypted key used for decrypting the encrypted cryptographic algorithm", with a "key information decryption section for decrypting the encrypted encryption/decryption key used for cryptographic communication and the encrypted key used for decrypting the encrypted cryptographic

algorithm to create an encryption/decryption key used for cryptographic communication and a decryption key used for decrypting the encrypted algorithm”

Barrett teaches a cryptographic terminal with stored encrypted algorithms, but does not teach a “key information storage section for storing and outputting the encrypted encryption/decryption key designated by the control section to be used for cryptographic communication and an encrypted key used for decrypting the encrypted cryptographic algorithm”

Masuda teaches a method of decrypting an algorithm but does not teach key information storage section for storing and outputting the encrypted encryption/decryption key designated by the control section to be used for cryptographic communication and an encrypted key used for decrypting the encrypted cryptographic algorithm

Brundrett teaches an encryption key that is encrypted but does not teach key information storage section for storing and outputting the encrypted encryption/decryption key designated by the control section to be used for cryptographic communication and an encrypted key used for decrypting the encrypted cryptographic algorithm

Epstein teaches a network with encrypted public and private keys but does not teach key information storage section for storing and outputting the encrypted encryption/decryption key designated by the control section to be used for cryptographic

communication and an encrypted key used for decrypting the encrypted cryptographic algorithm

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
